Hi David,
DEQ concurs with EPA that the MW03-175 Relocation Work Plan for the Former Reynolds Metals Facility is acceptable for implementation.

Thank you,
Erin

David,

EPA has reviewed the Well Abandonment Work Plan (Ash Creek, June 7, 2012) which was submitted on behalf of the Port of Portland. The Work Plan provides the scope of work for the relocation of groundwater monitoring well MW03-175 at the former Alcoa Reynolds Metals Facility (Facility). The relocation of the monitoring well is necessary to accommodate the pending revisions to the Williams Northwest Pipeline natural gas main.

The Work Plan describes the specific work proposed to abandon MW03-175 and relocate the well outside of the pipeline footprint. The Work Plan also states that the groundwater monitoring well will be decommissioned and the new well will be installed in accordance with State of Oregon requirements. EPA has determined that the Work Plan is acceptable, and work may proceed as scheduled.

Please let me know if you have any questions.

Chip Humphrey
EPA Remedial Project Manager
(503) 326-2678

Chip...attached is the work plan to relocate well MW3-175 to facilitate the Williams pipeline relocation. With respect to well construction, it is a like for like replacement and the well monitoring plan will continue to be implemented to collect water level data from this well. We would like to do the work beginning June 25. Please let me know if the plan is acceptable. Thank you in advance for your review. -David
